EXPERIENCE

M&G Prudential, Reading — Information Risk & Security Analyst

September 2018 - PRESENT

Working as part of the Supply Chain Security Team I have been:

- Engaging with a range of internal stakeholders to understand the security requirements of a project.
- Communicating with 3rd Party suppliers and assessing their security controls.
- Negotiating appropriate Information Security and Data Protection Clauses.
- Providing measured improvements to 3rd parties security controls and tracking their progress against the set deliverables.
- Providing a key role in the merger of two different supply chain focused teams
 - Performing process, policy and schedule comparisons
 - Working collaboratively to develop combined approaches
 - Documenting new processes and policies.
- Creating and leading the Cloud Application management process
 - Managing stakeholders from both sides of the business
 - Ensure business units follow the correct process for the purchase of cloud applications.
 - Performing Assurance testing on new applications
 - Linking the business in with different areas within the wider security function, including data privacy, Identity & access management, security architecture and translating requirements for these teams so that they are more understandable for the business.
 - Running workshops and training sessions for key personnel within the business to fully integrate the new process.
- Providing 3rd party incident management.
 - Leading on high profile incidents with impacts across the business.
 - Taking ownership of breaches from initial notification to closure.
 - Managing relevant stakeholders including the CISO, DPO and Risk function.

Prudential UK, Reading — *Junior Information Risk & Privacy Analyst*

April 2017 - September 2018

Working as part of the External Supplier Assurance and Compliance Team

I have been:

- Engaging with a range of internal stakeholders to understand the security requirements of a project,
- Communicating with 3rd Party suppliers and assessing their security controls,
- Negotiating appropriate Information Security and Data Protection Clauses,
- Providing measured improvements to 3rd parties security controls and tracking their progress against the set deliverables,
- Performing oversights on vendors specifically focusing on Information Security and Resilience,
- Investigating and establishing improvements in tooling.
- Performing third party Incident management which has included a range of situations from assessing impacts of major widespread situation including Wanna Cry, NotPetya and the recent Meltdown / Spectre vulnerabilities to investigating data breaches by our suppliers.
- Managing the use of Third Party tools including BitSight and Archer GRC.

Prudential UK, Reading — *Information Risk & Security Apprentice*

August 2016 - April 2017

As an Information Risk & Security apprentice I was working in two teams.

I focused the majority of my time on the Business Continuity side.

As part of the Business Continuity team my role included

- Providing assistance with Incident Management training.
- Ensuring our Business Continuity tools have up to date contact information for over 2500 employees
- Re-designing and developing various education and awareness programs for the business.

Personal Hobbies

Special Constable *Hampshire Constabulary*

I am currently in the process of training up to become a Special Constable. This involves me using my spare time to support the local police. I am hoping to qualify in May 2019 as a Special Constable which will allow me to support the Cyber Crime units within Hampshire Police.

Phishing Investigation

In my spare time I work with a group of Security researchers looking into Phishing campaigns attempting to Identify the source and Phishing kits behind these campaigns. I combine a range of Open Source techniques to turn a single email into a wealth of data which I can pass onto relevant Companies or authorities to get campaigns stopped or reduce their impact. The tools I use for this include URLScan.io , PhishTank, CISP, Virustotal and PulseDive.

Data Breach Research

I run a information security research twitter account allowing me to connect with a range of different people and teams across the world. I enjoy reviewing past breaches and providing high level summaries of the root cause, the impact and potential mitigations for both my company and the wider industry. An example of this is the recent CCleaner Breach. Here is an article I wrote around this data breach.
